

Eye ointments should always be used without contacting the eyes or skin with the tube.

Only use HYLO NIGHT[®] if the sealing of the folding carton was intact before the first use.

Step 1: Remove the protective cap of the tube.

Step 2:

Tilt your head backwards and gently pull on the lower eyelid using a finger of one hand.

Step 3:

With the other hand hold the tube in an upright position above the eye. Instil one strip of eye ointment into the gap formed between the eye and eyelid by gently squeezing on the tube.

Step 4:

Close your eye gently then blink normally.

Step 5: Replace the cap firmly back onto the tube.
